

one voice. every machine.

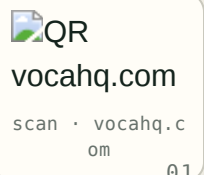

private speech-to-text, across the machines you own

Voca

Hold a hotkey or tap the phone control.
Text lands where you type. The
boundary stays visible.

print at 100%
US Letter landscape
color · do not shrink

vocalinux

System-wide voice typing for real Linux desktops.

v0.16.0

X11 + Wayland

AGPL-3.0

linux · no traffic lights

```
$ dictate --local  
ready.
```

vocamac

Hold a hotkey, speak, and text appears at the cursor.

v0.9.0

macOS 14+

Apple Silicon

AGPL-3.0

hold right option

dictate

WhisperKit · Homebrew or DMG

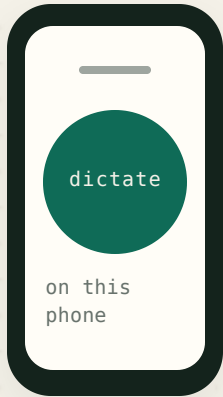

vocaphone

A private voice keyboard for phones.

Android 13+

iOS 17+ source

gateway optional

Tap the control. Speak. Text lands in the app you already have open. AGPL-3.0.

vocawin

voice typing that stays on this PC.

v0.1.0-beta.1

unsigned NSIS/MSI

AGPL-3.0-or-later

unsigned beta · no screenshot

Unsigned. Windows will likely say the publisher is unknown.

Not a Store listing. SmartScreen expected. Installer is on GitHub Releases (v0.1.0-beta.1, prerelease, unsigned). This page does not invent a VocaWin screenshot.

VocaGateway

early

vocagateway

Self-hosted shared compute for Voca clients. Pair with a QR code.

A placeholder for a QR code or host mark, labeled "VocaGateway 1U host mark".

NEVER ON-DEVICE

macOS / Linux / Docker Compose. Audio leaves the client only when you configure it. Trusted LAN, encrypted private network, or HTTPS. AGPL-3.0.

on this device.

After the model download, audio and the speech-to-text model stay on the phone or computer. Download and update still use the network.

or your gateway.

Configured audio leaves the client for the self-hosted machine. Never call this on-device. The two paths stay distinct.

THE MANIFESTO

small tools. clear boundaries.

Voca is a family of speech-to-text tools for machines you already own. The words land where you type. The boundary stays visible. No required account.

THE FAMILY DIRECTORY

01

On-device first.

Audio and the model stay on the machine after download.

02

Free and open source.

Named license per project.

03

Text lands where you type.

Hotkey or phone control.

04

No required account.

No Voca login.

05

Honest status.

We say what ships.

06

Built in public.
